

C'est l'occasion de re-découvrir les formules de calculs des Périmètres et Aires

	Figure	Périmètre \mathcal{P}	Aire \mathcal{A}
Rectangle		$\mathcal{P} = 2 \times (L + l)$ ou $\mathcal{P} = 2 \times L + 2 \times l$	$\mathcal{A} = L \times l$
Carré		$\mathcal{P} = 4 \times c$	$\mathcal{A} = c \times c = c^2$
Triangle rectangle		$\mathcal{P} = a + b + c$	$\mathcal{A} = \frac{a \times b}{2}$
Triangle quelconque		$\mathcal{P} = a + b + c$	$\mathcal{A} = \frac{c \times h}{2}$
Cercle - Disque		$\mathcal{P} = 2 \times r \times \pi$ ou $\mathcal{P} = d \times \pi$ où $\pi \approx 3,14$	$\mathcal{A} = \pi \times r \times r = \pi \times r^2$
